USER MANUAL
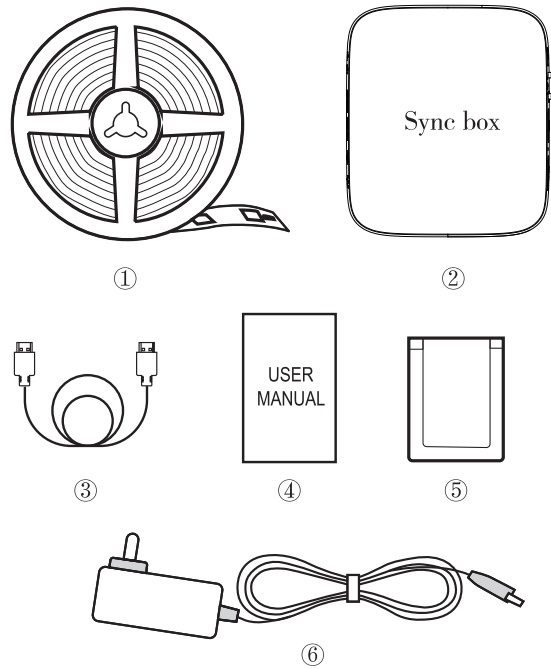

TV Sync Light Strip

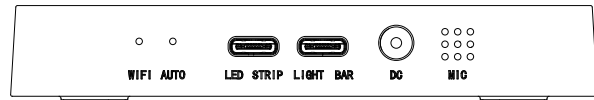

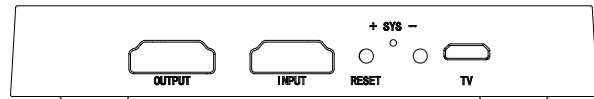

① ② ③ ④ ⑤ ⑥

① LED Light Strip X 1 ② Sync Box X 1 ③ Data Cable X 1
④ User Manual X 1 ⑤ Cable Clips X 6 ⑥ Power Adapter X 1

What You Get

Sync Box

WIFI: Be on when the sync box is successfully connected to WIFI. Flash when it fails to connect to WIFI.
AUTO: Light up when you put a tick on "Setting→Sync TV Switch" in the Smart Life APP.
LED STRIP: Connect the light strip.
LIGHT BAR: Connect the Ambient light bar (No connect)
DC: Connect the power adapter.
MIC: Pick up sounds around.

OUTPUT: Connect your TV or monitor.
HD: Flash when there is HD signal input.(The light between "INPUT" and "OUTPUT")
INPUT: Connect Apple TV/Fire TV Stick/PS4 and other signal sources.
RESET: Long press this button for 5s to restore the sync box to factory default settings.
TV: Connect to your TV with a micro usb cable (the cable is not included in the package), and the light strip will be turned on/off simultaneously with your television. But if this port is connected and the "AUTO" light is on, you can't control the light strip via the APP when your TV is off.

Safety Precaution

① Tear off the adhesive tape and stick the light strip clockwise to the back of TV from the bottom left corner. Fix the light strip in corners with clips.
② Connect the light strip to the "LED Strip" Type-C port of the sync box.
③ Connect Apple TV or other signal sources to the "Input" port of sync box with an HD cable.
④ Connect Your TV or monitor to the "output" port of the sync box with the data cable.
⑤ Power on the light strip with the power adapter and start to connect it with the Smart Life APP.

Note: The light strip will light up from end to end the first time it is powered on. The sync box will automatically detect the number of IC chips of the light strip and set the aspect ratio for 16:9 without manual operation.

Pairing Your Device

What You Need
• A WIFI router compatible with 2.4GHz 802.11 b/g/n (5GHz is not supported).
• A smartphone running IOS 9.0 (or above) or Android 5.0 (or above).

Install the Smart Life App
① Download the "Smart Life" App from Apple App Store (IOS devices) and Google Play (Android devices) / Scan the QR code below to download.

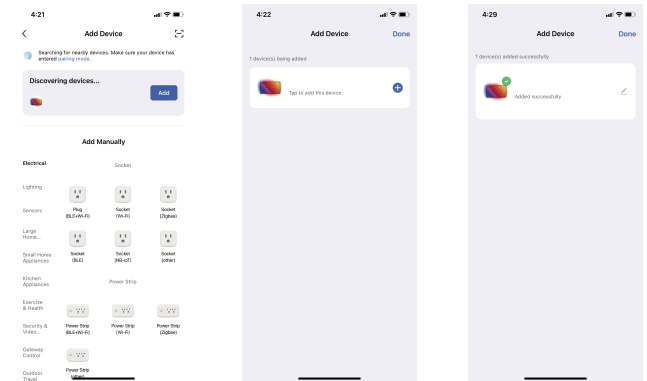

② Register and log in to the Smart Life App.

Reset The Device
① Long press the "RESET" button for 5s until the light strip flash, and then the sync box has been restored to factory default settings.

Connection Steps
① Open "Smart Life" App, and turn on WIFI and BLE on your smartphone. Tap "+" in the upper right corner and select "Add Device" --> "Auto Scan".
② Add the device from "Discovering devices".
Follow the instructions on the screen to finish connecting.

APP Control

Ambience
Video Mode
The video mode is for better TV immersive viewing experience. The light strip will capture the colors displayed on your TV and change its own color synchronously with the screen.

Wide Film Mode
The wide film mode is specially for better TV immersive viewing experience when there are black bars around your video. In this mode, the light strip can reduce the influence of the black bars and accurately capture the colors displayed. And the light strip will also change its own color synchronously with the screen.
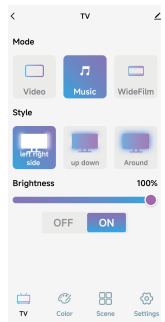

Brightness adjustment
There are three brightness levels to adjust, low brightness, medium brightness, high brightness (from left to right), you can adjust the brightness of the overall backlight according to the brightness of the TV picture change speed

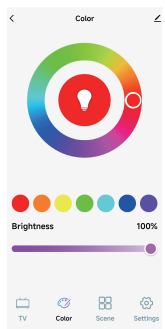

Music Mode
In the music mode, you can choose the lighting position and brightness. The light strip will capture every beat of the music or your voice, and change its color and brightness along with the rhythm.

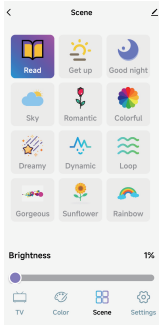

Color
In the "Color" interface, you can move the small circles to choose your favorite colors or adjust brightness.

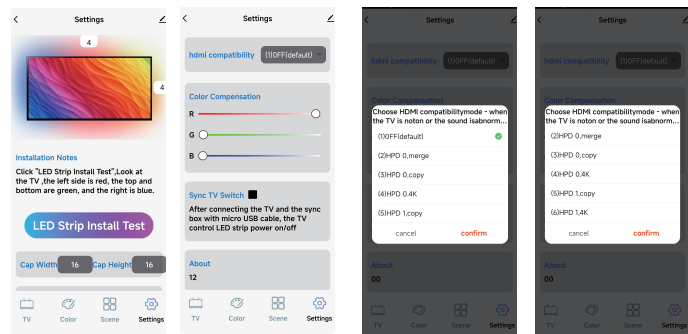

Scene
12 preset light effects are included for different scenes, and you can also move the small circles to adjust brightness.

Settings
If you need to set up, refer to the APP page for tips to set up.

HDMI compatibility mode
When the TV is not on, or the sound is abnormal, please select and try option 2-6 in the APP's TV settings, and restart the controller to make the setting take effect.

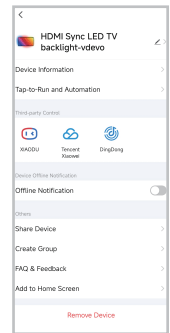

Home Management
Create a home group in the APP and your family members will get access to the device through "Smart Life" APP on their phones.

Voice Control
Please go to the Third-Party Voice Services in the Smart Life APP (Smart Life APP→Me→Third-Party Voice Services) to bind your app account to your Amazon account or Google account. After that, you can control the light strip with your voice.

FAQ:

Fail to turn on/control the light strip
• Check if the power supply is plugged in.
• Check if the data cable is connected correctly and the signal sources work normally.
• Check if the type-c cable of the light strip is plugged in tightly.

• Check if the "TV" port of the sync box is connected with your TV and whether the sync TV switch in the APP is ticked. If so, you can't control the light strip via the APP when your TV is off.
• Long press the "RESET" button for 5s until the light strip flash to restore the sync box to factory default settings. And follow the user manual to connect the Smart Life APP again.

Fail to connect with the APP
① Make sure the light strip is powered on.
② Check if BLE on your phone is turned on.
③ Make sure your smart phone and the light strip are connected to the same 2.4GHz WiFi network. (5Ghz is not supported)
④ Make sure you have entered a correct Wi-Fi password and the light strip is within the signal coverage of the router.
⑤ Follow the steps of "Pairing Your Device" in the user manual to connect with the APP again.

Colors of the light strip are not in sync with the TV
• Check if the installation direction is the same as the direction showed in the user manual. Please refer to "Installation Steps".
• Check if it is in video mode or wide film mode. Colors in other modes can't not be in sync with TV.

Fail to have screen sync light effects when using TV's built-in app
• The sync box needs HD signal input through a data cable to realize the screen sync function. It doesn't support built-in app.
